About Us

Public Sector Building Specification is read by specifiers and procurement officers who are working on building related projects across the public sector.

The publication's comprehensive editorial includes feature articles, case studies and a wide range of product information that is of key relevance to specifiers and managers working in this diverse and challenging environment.

Printed Tabloid size on a bright new paper stock, Public Sector Building Specification stands out from the crowd to ensure it creates the best possible platform to help promote your brand and product message.

Supporting our print issue is an interactive digital edition for the increasing number of readers who prefer to receive their magazine in this format. Digital issues can host video, audio and flash files, embed social media widgets and have full web, email and enquiry links for analytical purposes.

“ There are positive signs from the public sector. Education and health starts both rose, with community and amenity work the only area seeing a fall ”

Allan Wilén, Economics Director at Glenigan

Circulation

Understanding how the public sector works is key to successfully gaining procurement contracts. No two local authorities specify in the same way with different individuals often responsible for a wide range of projects dependant on the size of the council or the projects in question.

Public Sector Building Specification's circulation is updated on a daily basis. Our unique 24/7 feed from Glenigan project data enables us to track projects from outline planning through to completion. As key specifiers are added to the planning documents, we add them to the circulation file for each forthcoming issue. The information below represents a typical breakdown of the circulation for any one issue.

Job Title

Architects including technologists & technicians
 Building & Civil Contractors, House Builders
 Directors & Clients
 Building & Quantity Surveyors
 Structural & Mechanical Engineers

12,063

11,530

The circulation department at TSP Media has recently completed a full audit of every local authority within the UK and identified the full contact details of every person with the following job functions:

Chief Executive	392	Head of Regeneration	387
Head of Parks & Open Spaces	382	Head of Architecture/Building & Property	389
Head of Highways & Maintenance	250	Head of Grounds Maintenance	362
Head of Housing	352		
Head of Leisure Services	367	TOTAL	2881

The Market

The Government funded construction pipeline is looking solid and officials have been working closely with industry to improve the prospects for further growth.

This progressive approach will have a positive impact on projects in health, education and urban regeneration as the Government seeks to spread investment across the whole of the public sector. Social housing too is benefitting from the upsurge and investment across the housing landscape. With planning applications at their highest for over five years the public sector looks a highly lucrative and buoyant market to be investing in.

Public Sector Project Pipeline 2015

Through our unique full service access to Glenigan we have identified the following public sector projects moving through the planning process and identified the key specifiers and procurement officers who are working on these projects.

Category	Count	Value (£Million)
